Features

- Die-cast end plates join at articulated black reveals; machined aluminum knobs – no exposed fasteners
- All joints are gasketed – keep dirt and moisture out, prevent light leaks, maintain performance
- Non-corrosive aluminum and stainless steel construction
- Compact yet powerful – up to 250W halogen, 150W MH

Performance

Two parabolic reflector sections drive light across the ceiling from one edge. An elliptical section shields the lamp from normal viewing angles and redirects its light to a parabola. Glare is minimized and asymmetry of the beam is maximized resulting in high beam efficiency and superior surface uniformity.

Finish:

Style 101 fluted – bright clear anodized aluminum housing and door frame. Painted end plates, visor, yoke and canopy in choice of silver or semi-gloss black.

Style 102 smooth – semi-gloss white housing, door frame, end plates, yoke and visor.

Visor available solid or perforated. Perforated visor supplied with diffusing translucent insert.

Painted surfaces – 6 stage pretreatment and electrostatically applied thermoset powder coat for stable, long lasting and corrosion resistant finish.

Reflector – extruded high purity aluminum with clear anodized specular finish. All luminaire hardware – stainless steel. All mounting hardware – zinc or cadmium plated.

Mounting:

Canopy mounts over recessed outlet box.

Uplight pendant (back-to-back) or cantilever mounting assembly ordered separately; specify **X** mount. Supplied with remote ballast.

Electrical:

Use 90°C wire for supply connections.

Tungsten halogen – recessed single contact (RSC) or DC bayonet lampholders retained with patented clamping supports for maximum heat dissipation.

Metal halide – G12 lampholder for use with single ended lamp. Remote encapsulated high reactance autotransformer ballast (35W and 70W) or electronic ballast. Electronic ballast provides improved voltage regulation, energy savings and automatic shut-off feature to eliminate end-of-life lamp cycling.

For complete ballast specifications, see Accessories Section.

Standard:

UL listed or CSA certified for damp locations (Style 102 painted model recommended for damp locations). Where pendant or cantilever may be exposed to wind, consult factory.
