### **The Lighting Quotient Chosen as Top Pick by *BUILDINGS* Magazine**

**West Haven, CT – May 4, 2011** – The Lighting Quotient, an architectural lighting manufacturer, today announced that *BUILDINGS* Magazine has selected the Tambient Control Hub as a top 2011 Money-Saving Product. The Tambient Control Hub was measured against a rigorous set of criteria that had to be met for selection; initial cost, life-cycle cost, sustainability, longevity, energy efficiency and maintenance requirements.

The Tambient Control Hub is a programmable multiple fixture dimmer control that takes input from external sensors that respond to daylight and or motion and simultaneously controls the dimming ballast of fixtures connected to the control device. Tambient controllers are uniquely designed for Tambient's single-component task/ambient systems.

"Tambient Control Hub was chosen as a top Money-Saving Product because it provides an economical solution that offers significant cost savings to building management," says Chris Olson, chief content director, *BUILDINGS*.

Finalists were based on the money-saving qualities offered to building owners and facility managers in areas such as energy consumption, water savings, lighting, productivity, maintenance, and more. After reviewing over 125 submissions, editorial staff selected an elite group of 67 products.

"The Lighting Quotient is dedicated to increasing sustainability and producing cost-saving products" said Allison Schieffelin, Chairman and CEO of The Lighting Quotient. "We are pleased to be recognized for our continued efforts to help buildings achieve LEED certification and reduce their carbon footprint through the use of tambient lighting."

Tambient Control Hub will be included as part of a special feature in *BUILDINGS'* June 2011 issue.

**About *BUILDINGS***

*BUILDINGS* is a publication that serves over 73,450 building owners and professional facilities managers in North America. The monthly publication helps readers make smarter decisions relevant to the management, modernization, and operation of their facilities.
